

The Buffy Pad System (5" pads)

- Extremely fast de-felting
- Gentle, fast prep of new logs, wood
- Ideal as sole interior prep method
- Economical
- Super easy to use and change-out (no lock-nuts, or tools required!)

1. Buffy Pad (30 pads per bag)

The non-woven fabric pad that is pressed into the black plastic "T" hooks of the Grabber Pad - and twisted both ways to engage both legs of the hooks.

2. Grabber Pad (10 pads per bag)

This pad holds the Buffies and protects the expensive Backer Pad. Grabber Pads are used up at the rate of about 1 per every 10-20 Buffy Pads.

3. Backer Pad (1 each per bag)

This pad attaches to the 5/8" x 11 arbor (i.e., threaded end of the attachment shaft) of grinders and sanders, and holds the Grabber Pad. The rubber, tapered face allows the system to easily follow the contours of irregular wood surfaces.

(Should NOT be run at speeds higher than 4,000 rpm! Be sure to wear proper eye, respiratory and hand protection – contact Sashco at (800) 767-5656 for assistance. Keep people away that do not have proper protective equipment on.)
